Re: Routine hazardous waste determination evaluation.

Subject: Hazardous waste determination for heavy metals in waste paint overspray at
Emtrol, Inc.

Dear Mr. Grabusky:

I am enclosing information to support the statement that there are no heavy metals in the
paints used at Emtrol, Inc. during the years 1996 and 1997 (to date).

Enclosed are the following attachments:

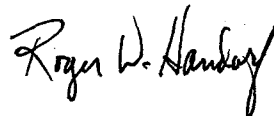

1. Spray Painting Log - for the year 1996
2. Spray Painting Log - for the year 1997 (to 7/22/97)
3. MSDS's
 - a. Plythane 890 (M.A. Bruder & Sons, Inc.)
 - b. Ply-mastic (M.A. Bruder & Sons, Inc.)
 - c. Rust-o-lastic (M.A. Bruder & Sons, Inc.)
 - d. Imron 326 - Y - 67637 (DuPont Co)
 - e. Imron VGY 511 (DuPont Co)
 - f. Steel It 4907 - A (Stainless Steel Coatings, Inc.)
 - g. Steel It 4907 - B (Stainless Steel Coatings, Inc.)
 - h. DP48 (PPG Industries, Inc.)
 - i. DP401 (PPG Industries, Inc.)

A review of items 1. and 2. shows what paint we have been using during this time period.
Item 3 shows that the paint we have been using contains no heavy metals.

I have calculated that we sprayed approximately 66.5 gallons of paint in 1996 and 23 gallons of paint in 1997 (to date), for your information.

If any further information or assistance is required, please do not hesitate to contact me at (717) 397-2531.

Very Truly Yours,

Roger W. Handorf
Quality/Safety Manager
